MAINTAINING QUALITY SERVICING

The insurance industry is complex and fraught with an abundance of data, administrative tasks, and processes. Inaccuracies and inefficiencies can directly impact your bottom line. By proactively identifying mistakes during processing, you'll be able to take remediation steps to improve your processes and significantly reduce time and cost—and most importantly your risk of E&O.

RESOURCE PRO QUALITY ASSURANCE

ReSource Pro's Quality Assurance creates an internal audit to identify mistakes for the purpose of assuring a quality product for your customer, and to help identify areas of operational improvement and employee development. After we complete an internal review, you will have management summary reports that provide valuable information including categorization of error type, by whom, and for which program.

1. ESTABLISH PARAMETERS

We'll set up a checklist to focus on compliance to your business standards and any specific areas of concern.

2. REVIEW

We'll check system entries and validate your data to identify variations in documentation or deviations from acceptable practices.

3. REPORT

You'll be provided a complete list of inaccuracies or inconsistencies with detailed information.

5. OPTIMIZATION

We'll help you optimize the internal processes we handle on your behalf.

4. PEER REVIEW

Together with your staff, we'll review processes and identify areas for improvement.
